

# EDUCATIONAL COMPONENT SYLLABUS

## FORENSIC VETERINARY MEDICINE

specialty	211 – Veterinary medicine	the obligation of discipline	main
educational program	Veterinary medicine	faculty	veterinary medicine
educational level	master	chair	normal and pathological morphology

### TEACHER

#### YATSENKO IVAN VOLODYMYROVYCH

Higher education – specialty “Veterinary Medicine”.

Scientific degree – Doctor of Veterinary Sciences in specialty 16.00.02 – pathology, oncology and morphology of animals.

Academic title – professor.

Work experience – 28 years.

Indicators of professional activity on the subject of the course:

- author of 450 scientific papers, 9 monographs;
- author of 5 textbooks, 2 atlases, 2 reference books, 50 teaching aids;
- experience of scientific work at the National Scientific Center “Institute of Forensic Expertise named after Honored Professor M. S. Bokarius”) from 2017 to the present;
- co-author of 15 publications in Web of Science and Scopus publications
  - participant in numerous scientific and methodological conferences.

## GENERAL INFORMATION ABOUT THE EDUCATIONAL COMPONENT (DISCIPLINE)

<b>Goal</b>	formation of professional knowledge and skills regarding theoretical and organizational and methodological support for conducting forensic veterinary examinations with the registration of research results.
<b>Format</b>	lectures, laboratory classes, independent work, individual assignments, modular tests.
<b>Detailing of learning outcomes and forms of their control</b>	<ul style="list-style-type: none"> <li>• ability to abstract thinking, analysis and synthesis, apply knowledge in practical situations (GC1, GC2, PLO3, PLO13) / modular test;</li> <li>• ability to understand modern scientific data and capabilities of forensic veterinary examination; know and competently use professional terminology (GC2, GC7, SC5, PLO 1, PLO 7, PLO 13) / modular test;</li> <li>• ability to organize forensic veterinary examination (GC2, GC6, GC8, PLO13) / modular test;</li> <li>• ability to use regulatory legal acts and regulatory and technical documents in forensic expert activities / modular test (GC7, SC14, PLO1, PLO13);</li> <li>• ability to use the latest achievements of forensic veterinary examination to formalize its (GC9, SC14, PLO1, PLO13) / modular test;</li> <li>• ability to organize, implement and control document flow during professional activities (GC1, GC2, PLO1, PLO13) / modular test work;</li> <li>• ability to apply methods and techniques of forensic veterinary research / control at the LPP, test, exam;; types of control (oral interview, written interview, test interview) (GC1, GC7, SC5, SC14, PLO1, PLO13);</li> <li>• ability to understand the logical sequence of actions and be able to draw up appropriate documentation during forensic veterinary examination (GC1, GC2, GC7, SC14, PLO1, PLO13)/ modular test work;</li> <li>• ability to understand and apply in forensic expert activities the norms and rules of professional ethics, deontology, confidentiality in the work of a forensic expert (GC1, GC10, SC14, PLO13) / modular test work;</li> <li>• ability to conduct research at the appropriate level, apply knowledge in practical situations, use tools, special devices for conducting special research while performing professional tasks (GC2, GC7, PLO1, PLO7) / modular test work;</li> <li>• possess moral and deontological principles in communicating with law enforcement agencies, interested persons (GC1, PLO1, PLO13)/ modular test work.;</li> <li>• ability to carry out educational activities among industry workers, the population, law enforcement agencies in order to inform about the latest opportunities in forensic veterinary examination (GC10, PLO1, PLO7) / modular test work.</li> </ul>
<b>Scope and forms of control</b>	4 ECTS credits (120 hours): 36 hours of lectures, 36 hours of laboratory classes; 48 hours of independent studies, current control (2 tests); final control – credit.

Teacher requirements	timely completion of tasks, activity, teamwork.
Enrollment conditions	"free enrollment".

## COMPONENT OF THE EDUCATIONAL STANDARD AND CURRICULUM

Competencies:	<p>GC 1. Ability to abstract thinking, analysis and synthesis.</p> <p>GC 2. Ability to apply knowledge in practical situations.</p> <p>GC7. Ability to conduct research at the appropriate level.</p> <p>GC9. Ability to make informed decisions.</p> <p>GC 10. Ability to communicate with representatives of other professional groups of different levels (with experts in other fields of knowledge/types of economic activity).</p> <p>SC5. Ability to apply methods and techniques of pathological and anatomical diagnosis of animal diseases to establish the final diagnosis and causes of their death.</p> <p>SC6. Ability to select, pack, fix and send samples of biological material for laboratory research.</p> <p>SC14. Ability to conduct forensic veterinary examination.</p>	Program learning outcomes:	<p>PLO1. Know and use terminology correctly.</p> <p>PLO3. To determine the essence of physicochemical and biological processes that occur in the body of animals in normal and pathological conditions.</p> <p>PLO7. To formulate conclusions on the effectiveness of the selected methods and means of keeping, feeding and treating animals, prevention of contagious and non-communicable diseases, as well as production and technological processes at enterprises for keeping, breeding or exploiting animals of various classes and species.</p> <p>PLO13. Understand the logical sequence of actions and be able to draw up the appropriate documentation during the forensic veterinary examination.</p>

## STRUCTURE OF THE EDUCATIONAL COMPONENT

### Section 1. ORGANIZATIONAL AND LEGAL BASIS OF FORENSIC VETERINARY EXAMINATION IN UKRAINE. FORENSIC VETERINARY EXAMINATION OF LIVE ANIMALS, FORENSIC VETERINARY THANATOLOGY, TRAUMATOLOGY AND TOXICOLOGY

Lectures Laboratory classes (LC)		Laboratory classes (LC)		Independent work (SR)	
Lecture 1.	Organizational and legal foundations of forensic veterinary examination in Ukraine.	LC 1	Procedure for the appointment and rules for the preparation, conduct and registration of materials for forensic veterinary examination (research).	SR 1	History of the formation, development and current state of forensic veterinary examination.
Lecture 2.	Forensic veterinary examination of live			SR 2	Sample documents in forensic veterinary examination.

	animals.	LC 2	Forensic veterinary determination of the severity of damage caused to the animal's health.	SR 3	General tasks of forensic veterinary examination.
Lecture 3.	The study of dying and death. Forensic veterinary assessment of cadaveric phenomena (forensic veterinary thanatology).	LC 3	Forensic veterinary definition of animal mutilation.	SR 5	Forensic veterinary diagnostics and assessment of damage caused to the health of an animal due to changes in atmospheric pressure, radiation damage.
Lecture 4.	Forensic veterinary examination of sudden death, exhumed and dismembered corpses, as well as corpses of newborn animals.	LC 4	Methodology for examining the scene of an incident and the corpse of an animal at the scene of an incident.	SR 6	Forensic veterinary characteristics of fractures, fracture-dislocations, dislocations and subluxations of bones of the animal skeleton, which are classified as serious bodily injuries.
Lecture 5.	General forensic veterinary traumatology.	LC 5	Procedure for conducting a forensic veterinary examination of animal corpses in the section hall of a specialized expert institution.	SR 7	Forensic veterinary criteria for injuries that penetrate the body cavities of an animal.
Lecture 6.	Forensic veterinary examination of blunt force injuries.	LC 6	Drawing up a conclusion of a forensic veterinary expert based on the results of the examination of the corpse.	SR 8	Forensic veterinary characteristics and diagnostics of animal poisoning with anticoagulant rodenticides.
Lecture 7.	Forensic veterinary examination for blunt force injuries.	LC 7	Forensic veterinary diagnostics and assessment of damage caused to the health of an animal by blunt objects		
Lecture 8.	Forensic veterinary examination for sharp force injuries.	LC 8	Forensic veterinary diagnostics and assessment of damage caused to the health of an animal due to thermal injuries and electric shock.		
Lecture 9.	Forensic veterinary examination for gunshot injuries.	LC 9	Forensic veterinary diagnostics and assessment of damage caused to the health of an animal due to gunshot		

			injuries.		
Lecture 10.	General forensic veterinary toxicology.	LC 10	Forensic veterinary diagnostics and assessment of damage caused to the health of an animal due explosive trauma.		
Lecture 11.	Forensic veterinary diagnostics and assessment of individual poisonings.	LC 11	Forensic veterinary diagnostics and assessment of damage caused to the health of an animal in cases of mechanical asphyxia.		
<b>Section 2. FORENSIC VETERINARY EXAMINATION IN CASE OF DISEASES AND DEATH OF ANIMALS DUE TO VIOLATIONS IN THEIR FEEDING, CONDITIONS OF KEEPING AND OPERATION; REGARDING DEFECTS IN THE PROVISION OF VETERINARY CARE AND THE ORGANIZATION AND IMPLEMENTATION OF VETERINARY SANITARY MEASURES; MATERIAL EVIDENCE OF ANIMAL ORIGIN</b>					
Lecture 12.	Forensic veterinary examination in case of diseases and death of animals due to violations of their feeding.	LC 12	Methods of forensic veterinary detection of damage caused to the health of animals as a result of violations of their feeding.	SR 9	Clinical manifestations and pathomorphological changes in animals with certain microelementosis and hypovitaminosis.
Lecture 13	Forensic veterinary examination in case of diseases and death of animals due to violations of their maintenance and exploitation, regarding cruel treatment.	LC 13	Methods of forensic veterinary detection of damage caused to the health of animals as a result of violations of their maintenance, care, and operation.	SR 10	Clinical manifestations and pathomorphological changes in animals with diseases of the digestive system that occur in case of feeding disorders.
Lecture 14.	Forensic veterinary examination of defects in the provision of veterinary care	LC 14	Forensic veterinary examination of defects in the provision of veterinary care	SR 11	Clinical manifestation and pathomorphological changes in animals with respiratory diseases that occur in case of violation of the conditions of their maintenance and operation.
Lecture 15.	Forensic veterinary examination of defects in the organization and	LC 15	Forensic veterinary examination of defects in the organization and conduct of veterinary and sanitary	SR 12	Clinical manifestation and pathomorphological changes in animals with diseases of the

	conduct of veterinary and sanitary measures.		measures.		musculoskeletal system that occur in case of violation of the conditions of their maintenance and operation
Lecture 16.	Forensic veterinary examination of defects in the organization of veterinary and sanitary measures.	LC 16	Methods of forensic veterinary examination of blood	SR 13	Forensic veterinary examination of catatrauma, automobile and railway trauma, sudden death.
Lecture 17.	Forensic veterinary examination of defects in the organization and conduct of veterinary and sanitary measures.	LC 17	Forensic veterinary examination of defects in the organization and conduct of veterinary and sanitary measures.	SR 14	Forensic veterinary characteristics of feed poisoning
Lecture 18.	Forensic veterinary examination of material evidence of animal origin.	LC 18	Methods of forensic veterinary examination of blood.

EVALUATION SYSTEM			
SYSTEM		POINTS	ACTIVITY TO BE EVALUATED
Final assessment (different credit, exam)	100 points ECTS (standard)	up to 100	40 % - Final testing 60 % - student's current work during the semester
Final assessment (non-differential credit)		up to 100	100 % - average grade for sections
Rating of section	100 points total	up to 30	30 % - answers to test questions
		up to 30	30 % - the result of mastering the block of independent work
		up to 40	40 % - student activity in class (oral answers)

## NORMS OF ACADEMIC ETHICS AND INTEGRITY

All participants in the educational process (including students) must adhere to the code of academic integrity and the requirements stipulated in the regulation "On Academic Integrity of Participants in the Educational Process of DBTU": to demonstrate discipline, good manners, respect each other's dignity, show kindness, honesty, and responsibility.
